

**Villa-Finder.com**  
**Full Stack Web Developer**  
*Singapore*

*Singapore, December 16th 2014*

**About Villa-Finder.com**

Our goal, that would soon be yours, is to be the #1 villa distribution and reservation platform in Asia.

We started in 2012 and have developed Villa-Bali.com into the #1 Villa website in Bali. Now we are looking at replicating the concept in the other resort destinations in Asia, always with the same amazing customer experience online & offline. Our growing portfolio includes close to 1,000 villas all around Bali, Thailand and Sri Lanka, displayed on our websites Seminyak-Villa.com, Villa-Phuket.com, SriLanka-Villa.com & Samui-Villa.com.

Based in Singapore, we are an international team of 20 from 6 different countries. We are a fastmoving internet company. Every technical solution we implement has been thought and designed to offer the best experience to our users (our clients and our employees). Our average time to market for an IT project (from scratch) is 2 months; and we always welcome new technologies and approaches.

**Now, we are looking for a FULL-STACK WEB DEVELOPER (potentially future CTO)**

Responsibilities

- Think of the next steps; think longterm strategy.
- Take over existing projects and help them to evolve.
- Design and build new products from scratch, from the idea to deployment
- Work on the whole stack, we build and host all our products.

The following skills are relevant to us

- Strong experience in the maximum of these technologies/concepts
  - Symfony2, NodeJS
  - HTML, CSS, jQuery, AngularJS
  - Elasticsearch
  - AWS tools, Unix CLI, infrastructure scaling
  - Web Design
- Strong Computer Science fundamentals: classic algorithms, data structures, networks
- Great team player, selfmotivated, autonomous and wellorganized.

Benefits

- Attractive salary & stockoptions
- Health insurance
- Travel in South-East Asia
- Live an entrepreneurial experience at the Heart of Singapore - the Asian Silicon Valley
