

**Villa-Finder.com**  
**Entrepreneurial Software Engineer, Full Stack**  
*Singapore*

Villa-Finder.com is the leading villa distribution solution in Asia. In the last 3 years, we have collected close to 1000 villas, in 4 destinations (Bali for Indonesia, Phuket and Koh Samui for Thailand, and Sri Lanka). Our team comes from 6 different countries and is only 25 on average! Our Headquarter is located in the most attractive district of Singapore: Chinatown. From our shop-house, we can easily commute into Singapore, access any food style at lunch, and go for a #TGIF team drink!

We are a high-tech company: engineers in our team are at the core of the company. . Every technical solution we implement has been thought and designed to offer the best experience to our users (our clients and our employees).

Tired of dealing with big crawling infrastructures and processes? Our average time to market for an IT project (from scratch) is 2 months; and we are always welcoming new technologies and approaches.

Why are we looking for an entrepreneur?

Our first goal is to make our company grow. For that, we need to understand perfectly our clients, , how they use our systems, how we can make their life better, and what we should do to offer them the best service they could ever imagine.

Responsibilities

- Design and build new products from scratch, from the idea to the deployment on the market.
- Think of the next steps; think long-term strategy.
- Take over existing projects and help them to evolve.
- Work on the whole stack, we build and host all our products.
